

**Bridgedale**<sup>®</sup>  
LITTLE THINGS MATTER

**FUSION TECH • MERINO PERFORMANCE • LIFETIME GUARANTEE**

**SPRING/SUMMER 2024**  
North America Edition

Fusion Technology is the unique blend of yarn and knitting technology that sets Bridgedale apart from other sock brands. It is the combination of the highest quality natural yarns, wrapped with high performance microfibres knit and finished on the latest machinery to create socks that ensure all day comfort. These unique combinations place yarns where they are needed to ensure that whichever Bridgedale sock you choose, they will perform to the highest level.

### MERINO PERFORMANCE

FusionTech Merino Performance brings together Merino Wool and New Wool with its soft resilient fibres and technical synthetic yarns in a knit to provide a close supportive fit, moisture wicking and outstanding durability for all day comfort. Ideal for long distance walking.

### MERINO COMFORT

FusionTech Merino Comfort blends Merino Wool with its unrivalled fineness and anti-bacterial properties with technical synthetic fibres in a knit that has a faster drying time and longer lasting durability than that of Merino Wool alone.

### MERINO COOL

FusionTech Merino Cool keeps feet dry and comfortable when you are working at your hardest.

### MERINO SPORT

FusionTech Merino Sport brings together Merino Wool and Lycra Sport to provide a supportive compression fit from calf through to the foot arch. This improves the joint position awareness around the ankle and mid foot aiding stability and balance.

### COOLMAX® - PERFORMANCE

FusionTech Coolmax® - Performance brings together Coolmax® known for its moisture wicking properties with technical synthetic fibres in a knit to provide a thin, close supportive fit with targeted T2 padding, balanced insulation and outstanding durability. Ideal for warmer climates in lighter footwear.

### COOLMAX® - SPORT

FusionTech Coolmax® - Sport brings together Coolmax® and Lycra Sport to provide a supportive compression fit from calf through to the foot arch. The structure of the sock helps improve the joint position awareness around the ankle and mid foot aiding stability and balance.

### MERINO LINER

Fusion Tech Merino Performance brings together Merino wool and technical synthetic fibres to provide a close fitting warm sock for use under your Bridgedale's or as an everyday sock.

### COOLMAX® - LINER

Coolmax® liners have a large contact area with the skin and utilise the moisture wicking properties of Coolmax® to move moisture swiftly out to the larger surface area of main sock where it can be evaporated quicker.

**COOLMAX®** is an incredibly soft yarn with a 4-channel construction that Bridgedale use to draw moisture away from the body to keep the wearer cool and dry on hot days.

**LYCRA®** is used in every sock in the Bridgedale range. It is an elastic fibre, which ensures Bridgedale socks give long-lasting fit.

**LYCRA® SPORT** branding is the accreditation given to sports socks with a premium level of elastification in the sock body. The LYCRA® fibre also gives Bridgedale socks long lasting fit and comfort, keeping their shape wash after wash.

- MOISTURE MANAGEMENT SYSTEM**  Allows the transfer of moisture away from the surface of the skin to keep feet warm, dry and comfortable.
- PERFORMANCE FIT**  Every course has LYCRA® fibre running through it giving a close supportive fit from foot to calf.
- COMFORT FIT**  Close supportive fit on your foot with a looser comfort fit around your calf. Allows sock cuff to be worn up or down.
- THERMO FIT**  Thermo setting every Bridgedale sock ensures a perfect fit. Wash after wash the sock returns to its designed size ensuring a perfect fit every time.
- WOMENS FIT**  Bridgedale were the first to offer a true WOMENS FIT sock. Women's styles are slimmer fitting, have bespoke sizing, adapted toe box and heel cup areas.
- FLAT TOE SEAM**  An almost invisible toe seam closes the toe box creating a comfortable, flat seam that doesn't create excess bulk or cause irritation.
- OVERFOOT VENTILATION**  Bridgedale's open mesh structure reduces insulation and promotes easy moisture transportation.
- FORWARD FLEX**  Prevents the sock from 'bunching' under the shoe tongue which helps to ensure comfort.
- SHOCK ZONES**  Advanced zonal padding system that provides extra support and comfort to areas of the foot and leg.
- ELASTICATED ARCH**  Keeps the sock locked in position. During wear this reduces the possibility of bunching and rucking which could cause irritation or blisters.
- Y HEEL**  Creates a 3D shaped heel cup that prevents excess bulk and slippage which helps to ensure comfort.
- ANTI-SHOCK CUSHIONING T2**  A loop within a loop that offers an additional level of impact protection resulting in all day long comfort.
- SPORT FIT**  Supportive compression from the cuff through the arch improves Proprioception (joint position awareness) around the ankle and mid foot aiding stability and improving balance.
- NATURAL TOE SPREAD**  Wide and un-restrictive, natural toe box allows toes to splay naturally.
- ZERO DEBRIS CUFF**  Extended, close fitting cuff to prevent debris entering the sock.
- TOE GUARD**  Reinforced toe box to avoid splits holes & blow outs when descending.
- WATERPROOF & BREATHABLE**  Allows perspiration to pass to the outer layer of the sock while preventing outside water from getting inside. 15,000 MP / 10,000 WP.
- WINDPROOF**  Prevents wind chill, the lowering of body temperature due to the passing flow of cool air across the skin, exacerbated when skin is wet.
- 4 WAY STRETCH**  A stretch PU membrane together with a matrix lamination process bonds three layers together ensuring they have excellent stretch.
- DURABLE OUTER**  An extremely durable and long lasting outer sock protects the Waterproof Membrane against abrasion from the boot.

In 1992 we started to “twist” natural yarns with man-made fibres to create proprietary yarns that enhance the durability and comfort of Bridgedale socks. Still found at the heart of every Bridgedale sock we branded this process Fusion Technology and for the last 25 years we have been refining and improving this technology to bring great comfort and durability to our customers.

15 years ago, Bridgedale launched the first truly sized women's technical outdoors socks. Through research and testing we recognised women have a wider forefoot with shorter toe bones, a narrower heel, and a shorter arch length. With this research and our continual quest to challenge what our knitting machinery could allow us to do, not only did we make a bespoke womens fit but we could also knit better fitting socks throughout our entire range.

It is often said when we have visitors come to our factory that we are not simply a sock knitter, we are a family of sock engineers. For over 100 years we have knit socks in Newtownards and over that time we think we have become pretty good at it. We push our knitting machines to their limits to see what they will do to enhance comfort or increase sock durability and the machine manufacturers have said on several occasions that these machines are not supposed to do what we get them to do.

+

# SOCK ENGINEERS

# LINERS

Minimal cushioning and ideal for wearing next to the skin to form a secondary layer of protection.

Designed to be worn for comfort, additional warmth and practicality, liner socks will help to keep you comfortable for as long as possible whatever the terrain is like. Perfect for protecting your feet during treks and hikes or even to wear everyday on their own.

# LITTLE THINGS MATTER

At Bridgedale we believe it's the little things that make the biggest difference to our lives.

It's the little things that put a smile on our faces and a spring in our step.

It's the little things that come together to make big things happen. For over a century our socks have been one of the little things that transform your journey every day.

Our passion, experience, and care for every tiny detail, from our FIT, our FUSION TECHNOLOGY and our GUARANTEE, have helped us create the world's most comfortable and enduring socks.

Little by little. Step by step. We're changing the world beneath your feet.

## UNISEX / MEN'S SIZE CHART

Size	Size Code	UK	Europe	USA	CMS
