- NEW** Mugi Grip & Mugi Grip Women's Gloves (pg. 63 & 65)

Impact & Responsibility

We are committed to reducing our impact on the environment, to identify and cut our greenhouse gas emissions, and to enhance our corporate and social responsibility (CSR) in all areas of our business.

Each product listing is labelled with icons where they meet the below CSR criteria, further information about each product's makeup can be found in the Fabric Data Matrix (pg. 108).

Natural Fibres

This product has natural fibre content in one or more of its main fabrics or insulation fill. We are on a journey to use more natural fibre alternatives as they are renewable, biodegradable, and less dependent on the petroleum industry. Minor components and trim are excluded.

DOWN CODEX® Audited Source

Mountain Equipment's DOWN CODEX® places animal welfare, quality, and sustainability at the heart of all our down-insulated products. First created in 2009, its key aim is to manage and reduce risk in our down supply chain by constantly working to develop our knowledge and best practice, backed up by comprehensive and transparent auditing using the Responsible Down Standard (RDS) 3.0 system.

Fluorocarbon Free

The main fabric(s) of this product utilises a fluorocarbon-free DWR. These DWRs are effective water repellent treatments without harmful environmental impact. For further information on PFAS within the products please refer to the Fabric Data Matrix (pg. 108).

Recycled Content

This product has recycled content in one or more of its main fabrics (or insulation fill where applicable). The recycled fibers can be from either post- or pre- consumer waste. Components, e.g. zips and minor trims are excluded.

Extended Sizes

Over recent years, we have steadily increased our size offering on core products to meet consumer demand. They are available in a smaller and/or larger size set than our standard and indicated in the product size guides.

DOWN CYCLE® Recycled Down

Starting in 2017 we have aimed to close the loop, creating a community led, down recycling initiative to reduce landfill, decrease water consumption and lower the carbon impact of down. All products carrying the DOWN CYCLE® logo are part of this initiative, with the recycled down guaranteed to be a minimum 700 fill power.

Fair Wear Code of Labour Practices

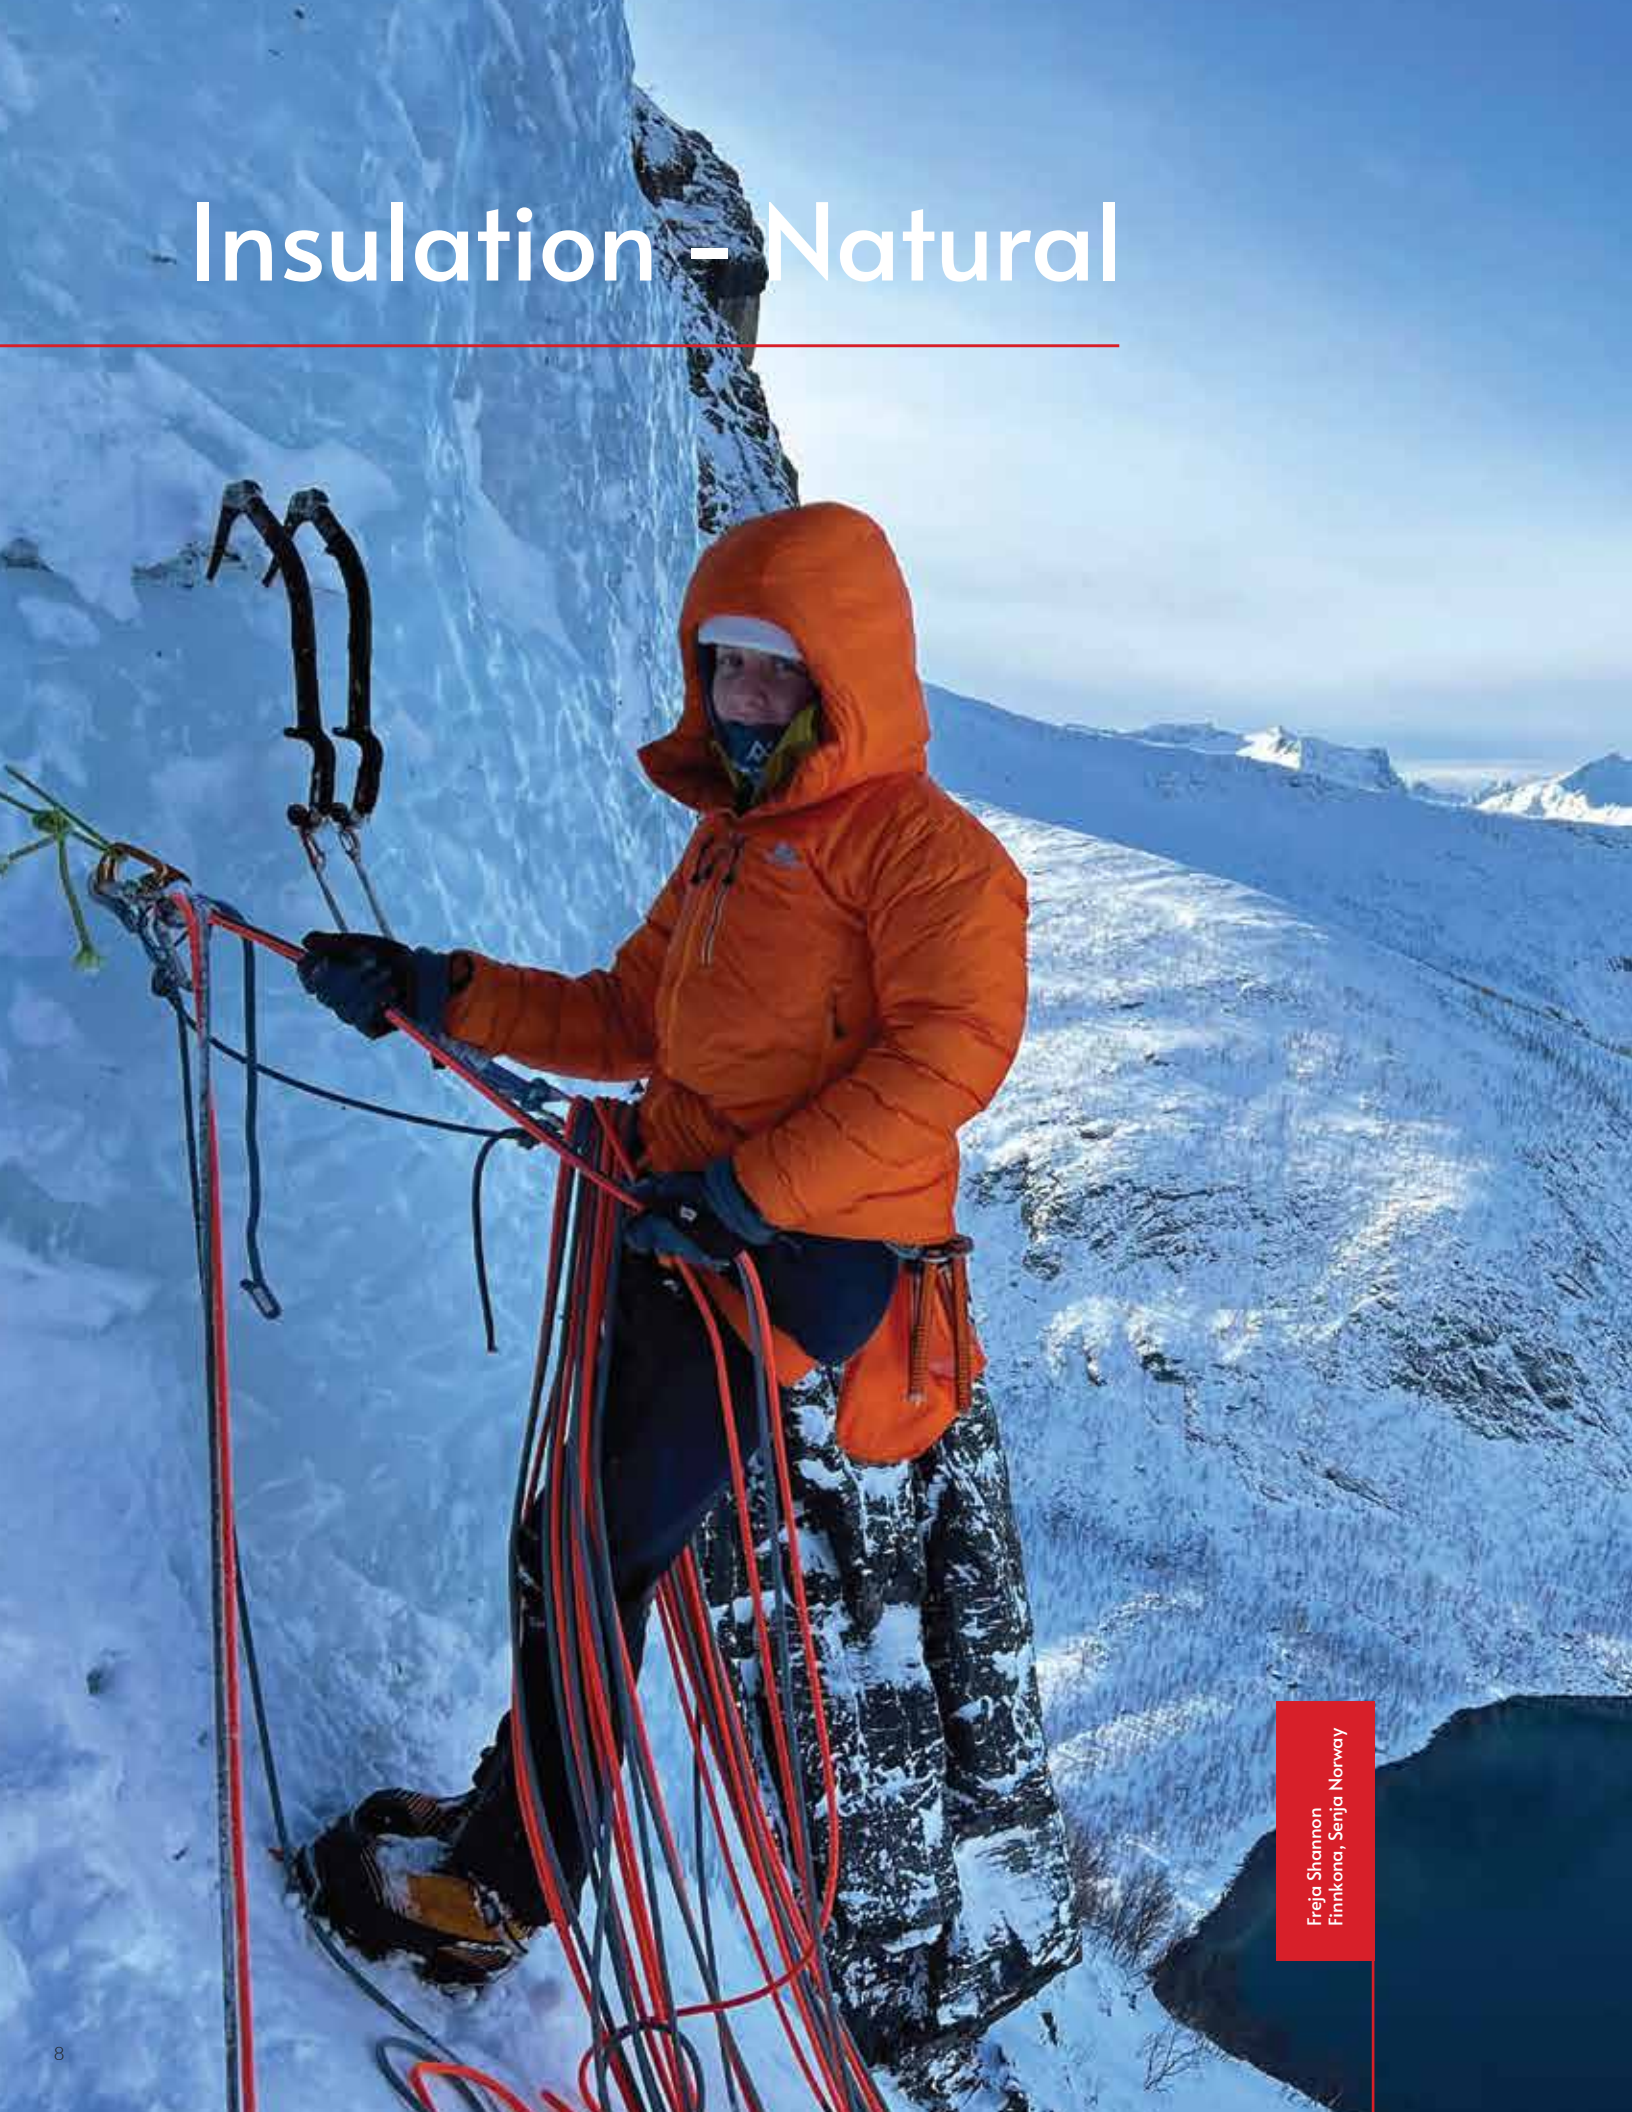

Mountain Equipment has been a Fair Wear Foundation (FWF) member since 2012. Products that carry this logo are manufactured in FWF certified production facilities. We work together to monitor and ensure fair and safe working conditions across the production process, implementing the 8-point Fair Wear Code of Labour Practices.

* Please note that all suppliers must agree to the Fair Wear Code of Conduct and must agree to on-site inspections being conducted, at regular intervals. More details on this and our status as a Fair Wear Leader Brand can be found on our website.

Firestorm

Developed for Alpinists needing the very lightest warmth in real-world conditions; the lightest, most efficient, most protective down-filled insulation we have ever developed.

A hybrid construction where the internal baffle structure and protective outer layer are constructed separately. Consisting of either box-wall, stitched-through or pleated baffles to maximize insulation and down control where it's most required, while at the same time maximizing the user's freedom of movement.

FIRESTORM™

WARMER

Up to 20% more air is trapped decreasing thermal conductivity

LIGHTER

Up to 20% lighter compared with a conventionally constructed down jacket

MORE PROTECTIVE

No heat loss due to wind and less water ingress

PROOF OF CONCEPT & TESTING

You've got this amazing concept, but then it needs testing.

A 2-year development cycle starting with Paul Ramsden and Nick Bullock's expedition to Gongga in China with a prototype jacket. Nick and Paul had appalling weather and barely got onto their route. The jacket was perfect for the sustained bad weather they experienced.

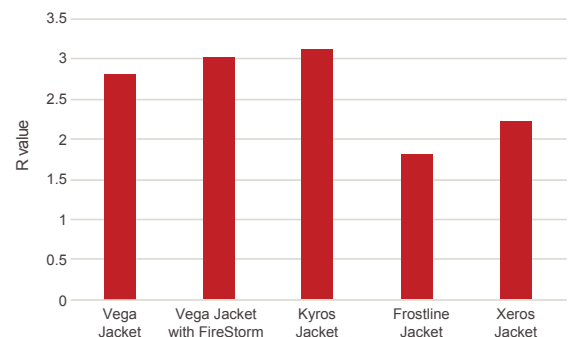

We then had to try to quantify the benefits of this construction, and this wasn't as easy as we'd hoped. The thing is, no one has done this sort of testing before, so you have to develop test methods, and no lab tests exist which replicate alpine climbing.

An entirely new test method was necessary.

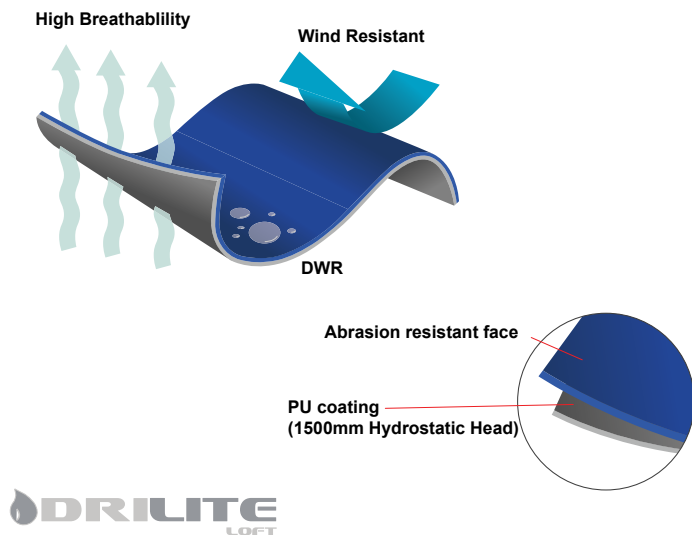

Working in conjunction with the Aitex Institute in Spain we developed a test which could more closely replicate the conditions found when alpine climbing in real-world conditions.

Results

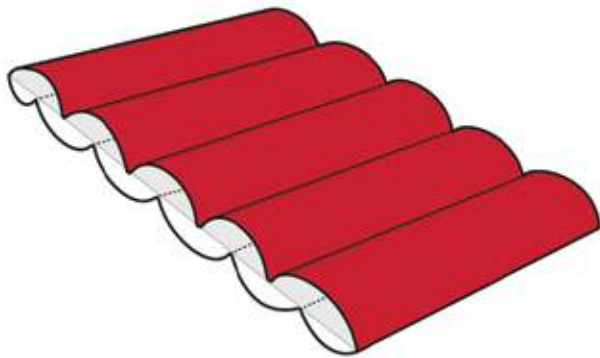

Drilite Loft

Drilite Loft is our exclusive range of highly water repellent fabrics used in our insulated clothing and equipment. The original Drilite Loft, introduced over 30 years ago, was years ahead of its time: a highly breathable, exceptionally lightweight, and very water repellent fabric.

Offset Construction

Offset construction is deceptively simple. It features an inner panel to which opposing baffles are then sewn, each offset against another. A stitch through panel is made, and then one side of that is stitched to a new piece of fabric on the other side. To sew it, the panel must continuously be flipped one way and then the other, making it time consuming to make but when compared with a box-wall construction, much simpler.

At the same time the conjoining layer that each offset layer attaches to is not only exceptionally light, it is also heat reflective, further adding to this construction methodologies advantages.

*Available in:
The Baltoro and Paiyu jackets for both men and women
use of offset baffle construction throughout.*

KRYOS MEN'S JACKET

Developed for the cutting edge of Alpine style climbing; the optimum combination of warmth, protection and minimal weight.

Informed by feedback from some of the world's best Alpinists and extensive R&D work this is the jacket for the hardest and most committing lines in the high mountains. A WINDSTOPPER® drop outer provides proven additional warmth and weather resistance whilst the Super Alpine Hood gives unrivalled protection.

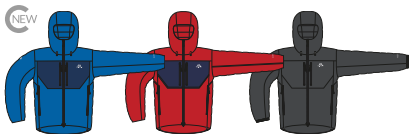

- WINDSTOPPER® 10D shell fabric is lightweight and durably weather resistant
- FIRESTORM™ construction for greater warmth, wind resistance and weather protection
- WINDSTOPPER® 10D hem, cuff and hood lining
- Hybrid baffling combines both conventional stitched-through and pleated baffle construction
- 234g (Size L) of Goose Down with a minimum content of 90/10 800 fill power
- Super Alpine HC Hood
- Halo collar
- 2-way YKK® moulded centre front zip with lightweight offset rear baffle
- 2 zipped hand warmer pockets, 2 chest pockets, 2 large inner drop pockets
- Elasticated cuffs and dual tether hem drawcords

Sizes: S to XXL

Weight: 610g / 21.5oz (approx.)

Fabric: 10D - 39g / 1.2oz

XEROS MEN'S JACKET

A super-lightweight and highly protective down jacket for the hardest modern Alpine routes.

Part of an extended R&D project with some of the best Alpinists in the world, this minimalist down jacket has been developed to offer maximum protection and warmth for the least possible weight and pack size. With a WINDSTOPPER® drop outer shell, insulation and weather resistance are optimised.

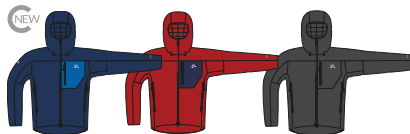

- WINDSTOPPER® 10D shell fabric is lightweight and durably weather resistant
- FIRESTORM™ construction for greater warmth, wind resistance and weather protection
- WINDSTOPPER® 10D hem, cuff and hood lining
- Stitched-through baffle construction throughout
- 140g (Size L) of Goose Down with a minimum content of 90/10 800 fill power
- Super Alpine HC Hood
- 2-way YKK® moulded centre front zip with lightweight offset rear baffle
- 2 zipped hand warmer pockets, chest pocket, 2 large inner drop pockets
- Elasticated cuffs and dual tether hem drawcords

KRYOS MEN'S PANT

Highly protective down pants with exceptional mobility for Alpine style climbing at altitude and fast moving Polar journeys.

Originally developed for hard climbing on 7000m peaks these light and exceptionally weather resistant down pants are equally at home on minimalist Polar expeditions. WINDSTOPPER® shell fabric resists wind and snow whilst aiding thermal efficiency, and an active cut ensures a full range of movement in hostile conditions.

- WINDSTOPPER® 10D shell fabric is lightweight and durably weather resistant
- FIRESTORM™ construction for greater warmth, wind resistance and weather protection
- WINDSTOPPER® 10D hem lining
- Hybrid baffling combines both conventional stitched-through and pleated baffle construction
- 150g (Size L) of Goose Down with a minimum content of 90/10 800 fill power
- Full length 2-way moulded YKK® side zips
- Adjustable semi-elasticated waist with brace attachment points
- Laminated and stiffened inner hem construction

SUPER COULOIR GAUNTLET

Warm, waterproof and dexterous, these highly protective gauntlets are optimised for serious cold weather climbing.

A waterproof GORE-TEX insert and Pittards® Armortan® Goatskin leather palm combine with our super dexterous Climbing fit to make these an exceptionally protective gauntlet for the biggest and hardest routes. Pre-curved and articulated fingers ensure secure handling of krabs and screws as well as a firm grip on tools.

- GORE-TEX insert is durably waterproof, windproof and highly breathable
- EXOLITE 210 stretch double weave soft shell outer
- Pittards® Armortan® Goatskin leather palm, back of hand, and palm overlay
- Climbing fit with pre-curved and articulated fingers and thumb
- Fibre pile inner on back of hand
- Micro fleece inner lining on palm
- Gauntlet design for added protection
- Single-handed drawcord closure
- Removable wrist tethers
- Karabiner carry loops

Sizes: XS to XXL

Weight: 240g / 8.5oz (approx.)

Fabric: 210g / 6.2oz

Content: Outer: 92% polyamide, 8% elastane, palm: 100% leather; lining: 100% polyester; insert: ePTFE

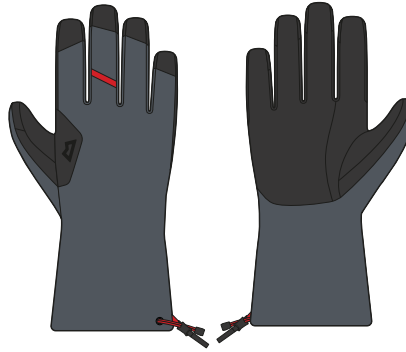

ME-01054 Shadow/Black

ME-005668

RANDONEE GAUNTLET

A highly breathable and protective gauntlet for big alpine-style climbs.

With a stretch woven back and our Climbing fit the Randonee Gauntlet is a dexterous and protective glove. A full fibre pile lining dries fast to make this an ideal choice for multi-day routes. The Pittards® Armortan® Goatskin leather palm provides the durability required for long abseil descents.

- 4-way stretch Polyamide fabric with laminated water resistant membrane
- Pittards® Armortan® Goatskin leather palm and back of hand overlay
- Climbing fit with pre-curved and articulated fingers and thumb
- Fibre pile lining throughout
- Roll tip fingers for comfort and dexterity
- Gauntlet design for added protection
- Reversed suede nose wipe
- Single-handed drawcord closure
- Removable wrist tethers
- Karabiner carry loops

Sizes: XS to XXL

Weight: 200g / 7.1oz (approx.)

Fabric: 210g / 6.2oz

Content: Outer: 94% polyamide, 6% elastane, PU membrane; palm: 100% leather; lining: 100% polyester

DIREKT GAUNTLET

A super precise soft shell climbing gauntlet for the hardest and most committing leads.

The Direkt Gauntlet uses a stretch woven soft shell back and two part leather palm for durability with exceptional grip. A high loft fleece lining on the back of the hand maximises warmth whilst a microfleece palm lining ensures the best possible grip on ice tools and critical protection.

- EXOLITE 210 stretch double weave soft shell outer
- Pittards® Armortan® Goatskin leather on highest wear palm area
- Pittards® Oiltac® leather palm insert for exceptional grip
- Climbing fit with pre-curved and articulated fingers and thumb
- Gauntlet design for added protection
- High loft fleece lining on back of hand for low profile warmth
- Microfleece lining on palm for maximum grip and dexterity
- Single-handed drawcord closure
- Removable wrist tethers
- Karabiner carry loops

Sizes: XS to XXL

Weight: 150g / 5.3oz (approx.)

Fabric: 210g / 6.2oz

Content: Outer: 92% polyester, 8% elastane; Palm: 100% Leather; Lining: 100% Polyester

HARD MIXED GLOVE

For the very hardest ice and mixed leads; a glove that perfectly balances dexterity, warmth and protection.

Developed in conjunction with our team of Alpine and winter climbers, this is a glove designed to provide maximum grip and dexterity. A Pittards® Armortan® Goatskin palm provides a sure grip on leashless tools and screws whilst a pile and microfleece lining and reflective internal scrim maximise insulation.

- 4-way stretch Polyamide fabric with laminated water resistant membrane
- Pittards® Armortan® Goatskin leather with digital surface on palm and with reinforced fingertips
- Climbing fit with pre-curved and articulated fingers and thumb
- Fibre pile lining on back of hand
- Micro fleece lining bonded to palm for dexterity
- Heat reflective internal scrim on back of hand for additional warmth and durability
- Danted fingers for comfort and precision
- Adjustable wrist closure
- Karabiner carry loops

Sizes: XS to XXL

Weight: 120g / 4.2oz (approx.)

Fabric: 240g / 7.1oz

Content: Outer: 94% polyamide, 6% elastane, PU membrane; palm: 100% leather; lining: 100% polyester
