# Proven, protective and precise

In a world of increasing complexity, Alpinism is meaningful simplicity.

A life lived in the pursuit of raw experiences in the mountains, within the fellowship of Alpinism, is a focused yet deeply rewarding existence.

More than the physical act of moving and climbing, Alpinism is a deep connection to yourself, the decisions you make, the respect you have for others and the reverence you feel for our steep and wild natural world.

Alpinists share more than route ticks and summit objectives, we share a dedication to a life lived just outside what most would consider the normal. Not just a mere sport, Alpinism is a culture. A way of life; our way of life.

Mountain Equipment lives at the heart of the culture of Alpinism, we understand the nuanced needs of those who live their lives in the Alpinist way. The clothing and equipment we create is born from deep experience. Proven, protective and precise, our designs enable every Alpinist climbing, living and working to make their own mark on our culture.

---

This workbook contains all products that are available for sale from March 1<sup>st</sup> 2023 through to January 31<sup>st</sup> 2024.

We take great care to ensure all information is correct at time of going to press. As always, specifications may occasionally be subject to change. All weights quoted are for size L or size 12 unless otherwise stated and are rounded to the nearest 5g. Please note that due to manufacturing tolerances actual weights may differ slightly from those stated.

A photograph of two mountaineers in orange sleeping bags on a rocky mountain peak at dawn. The scene is set against a backdrop of a vast, snow-covered mountain range under a clear sky. The lighting is soft and warm, highlighting the texture of the sleeping bags and the ruggedness of the rock.

P

### **PFC-Free**

Our products are defined as being fluorocarbon-free when no PFC's have been used in the manufacture of a product's major fabrics.

Components e.g. zips are excluded. Unfortunately, because PFC's are now so widely dispersed in the environment it is impossible to eradicate traces of PFC's entirely and some level of contamination cannot be avoided.

R1

### **100% Recycled**

We define a product as 100% recycled when 100% of a product's major fabrics and fill (if applicable) is composed overall from recycled content. Components e.g. zips and minor trim e.g. interlinings are excluded.

O

### **Organic Cotton**

For a product to be labelled as using Organic Cotton, 100% of all the cotton used must be from an Organic source. Minor components and trim are excluded.

DC

### **DOWN CODEX® Audited Source**

A down product is defined as causing no unnecessary harm and coming from an ethical and traceable source when 100% of the down used comes from a DOWN CODEX® audited source.

R.5

### **50% Recycled**

We define a product as 50% recycled when at least 50% of a product's major fabrics and fill (if applicable) is composed overall from recycled content.

Components e.g zips and minor trim e.g. interlinings are excluded.

FW

### **Fair Wear On-Site Inspection**

As a company Mountain Equipment actively monitors in excess of 90% of its production facilities. We define an individual product as having been manufactured in a Fair Wear audited facility when it comes from a factory proven to have had an on-site inspection / audit carried out within the past 3 years.\*

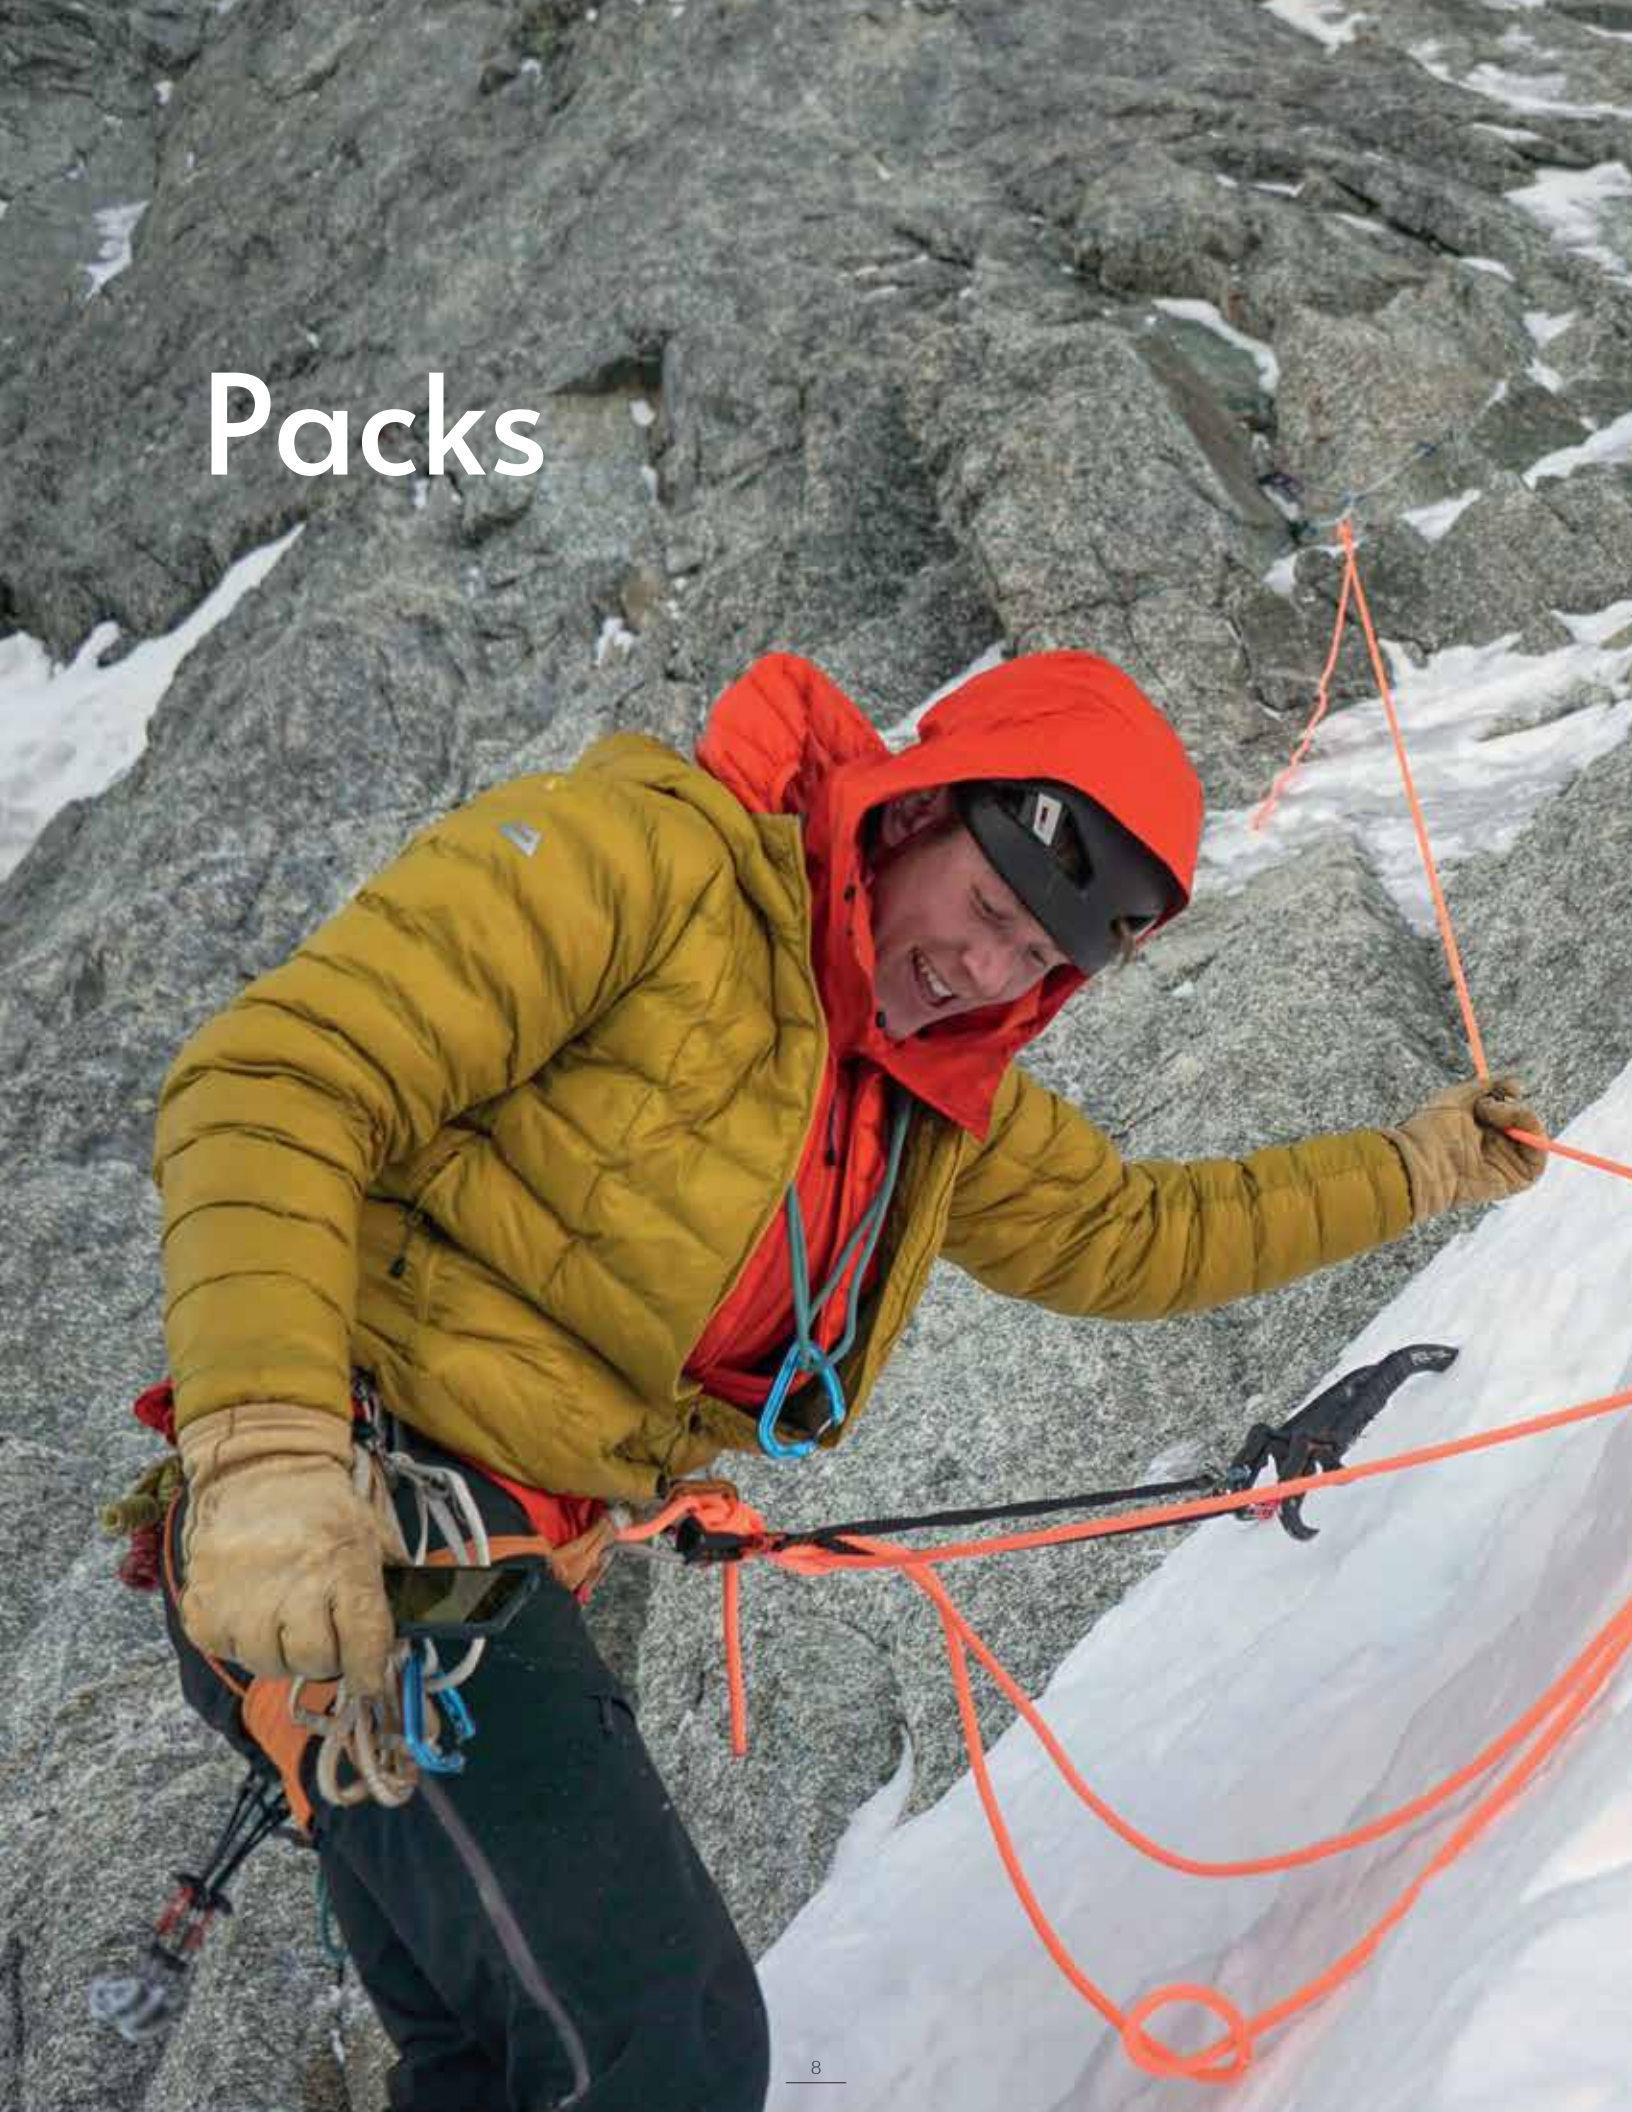

### **Lesser Impact**

In order for a product to carry our 'Lesser Impact', the product must be able to demonstrate that it has lowered its overall environmental impact by means other than those specifically listed above. For example, it may use a dyeing method that significantly reduces water and energy consumption. All such claims must be verifiable through supplier verification and material certification and traceability.

\* Please note that all suppliers must agree to the Fair Wear Code of Conduct and must agree to on-site inspections being carried out. More details on this and our status as a Leader Brand can be found on our website.

**TUPILEK 50-75**

This durable, highly weather resistant and lightweight expedition pack is the definitive choice for technical objectives on the highest peaks. Designed to comfortably carry big loads on long approaches it compresses to become a stripped back alpine pack on steeper ground.

- 50 litre optimum capacity extendable to 75 litres
- PACT™ 300 & 100 R2 fabrics; durable, lightweight and water resistant
- On Demand Minimalism; all components removable
- Drawcord closure for easy packing and rapid access
- Durable aluminium Grappler™ buckle\*
- Internal extension collar with drawcord closure for over-packing
- Side compression straps with aluminium Hammerhead™ toggles
- Removable thermoplastic composite frame panel
- High Density EVA shoulder straps and removable EVA back panel
- 40mm webbing hipbelt with removable High Density EVA moulded hip-fins
- Dual axe toggles with integrated pick pocket
- Daisy chain system, haul loops and internal hanging loops
- Supplied with Shockcord System

Min Weight: 650g / 1lb 7oz

Max Weight: 1040g / 2lb 5oz

Back Length: 47cm / 19in

ME-01415  
Magma

ME-006560

**TUPILEK 45+**

Ideal for multiday routes or the longest climbing days, this durable, highly weather-resistant yet lightweight climbing pack is optimised for alpine and winter climbing on the steepest lines and biggest faces.

- 45 litre optimum capacity
- PACT™ 300 & 100 R<sup>2</sup> fabrics; durable, lightweight and water resistant
- On Demand Minimalism; all components removable
- Integrated cowl-lid closure for easy packing and weather protection with durable aluminium Grappler™ buckle\*
- Internal 'floating' accessories pocket; accessible from inside or outside of pack
- Internal weather-proof cowl with roll-top closure
- Side compression straps with aluminium Hammerhead™ toggles
- High Density EVA back panel, shoulder straps and 38mm webbing hipbelt with removable hip-fins
- Dual axe toggles with integrated pick pocket
- Haul loops, Daisy Chain system and Shockcord system

Min Weight: 730g / 1lb 9.7oz

Max Weight: 1020g / 2lb 4oz

Back Length: 47cm / 19in

ME-006025

**TUPILEK 37+**

Rewarding the minimalist and focussed alpinist with arguably our finest all-round pack. This durable, highly weather-resistant yet lightweight climbing and mountaineering pack is perfect for summer alpine and winter climbing on the steepest lines.

- 37 litre optimum capacity
- PACT™ 300 & 100 R<sup>2</sup> fabrics; durable, lightweight and water resistant
- On Demand Minimalism; all components removable
- Integrated cowl-lid closure for easy packing and weather protection with durable aluminium Grappler™ buckle\*
- Internal 'floating' accessories pocket; accessible from inside or outside of pack
- Internal weather-proof cowl with roll-top closure
- Side compression straps with aluminium Hammerhead™ toggles
- High Density EVA back panel, shoulder straps and 38mm webbing hipbelt with removable hip-fins
- Dual axe toggles with integrated pick pocket
- Haul loops, Daisy Chain system and Shockcord system

Min Weight: 680g / 1lb 8oz

Max Weight: 970g / 2lb 2.2oz

Back Length: 47cm / 19in

Magma

ME-006559

**TUPILAK 30+**

The smallest of our durable, highly weather-resistant yet lightweight Tupilak series, this pack is ideal for minimalist alpinism and those climbing more accessible routes.

- 30 litre optimum capacity
- PACT™ 300 & 100 R<sup>2</sup> fabrics; durable, lightweight and water resistant
- On Demand Minimalism; all components removable
- Drawcord closure for easy access combined with roll top inner cowl for weather protection
- Internal 'floating' accessories pocket; accessible from inside or outside of pack
- Removable rope strap with durable aluminium Grappler™ buckle\*
- High Density EVA back panel, shoulder straps and 38mm webbing hipbelt with removable hip-fins
- Dual axe toggles and attachment points for side compression straps
- Haul loops, Daisy Chain system and Shockcord system

Min Weight: 580g / 1lb 4.5oz

Max Weight: 840g / 1lb 13.6oz

Back Length: 47cm / 19in

ME-01415  
Magma

ME-006168

**TUPILAK VEST 14**

A technical vest pack for fast moving mountain days in all weathers and across the seasons; as stable and light as a running pack and as rugged and functional as a climbing pack.

- 14 litre optimum capacity
- PACT™ 300 & 100 R<sup>2</sup> fabrics; durable, lightweight and water resistant
- Drawcord closure with integrated Cohesive cord lock and durable aluminium Grappler™ buckle\*
- Vest pack harness with large mesh pockets and zipped phone pocket
- Zipped internal pocket and large front stash pocket
- Side zip for rapid access into main pack body
- External sleeve pocket for pole stowage
- Recycled polyester air mesh harness and back panel
- Concealed dual axe retainers with integrated pick pocket
- Compression wing system to stabilise load

Min Weight: 420g / 14.8oz

Max Weight: 450g / 15.9oz

Sizes: S/M, L/XL

# Sleeping Mats

Richard Bailey & Kerry Mellor,  
Leck, Airedale, Calderdale  
Photography by Hamish Frost

## SLEEPING MATS

---

An essential part of any sleeping system, a mat is every bit as important as a good sleeping bag. Our range of sleeping mats includes self-inflating foam mats and our innovative Aerostat series of insulated pressurised air mats.

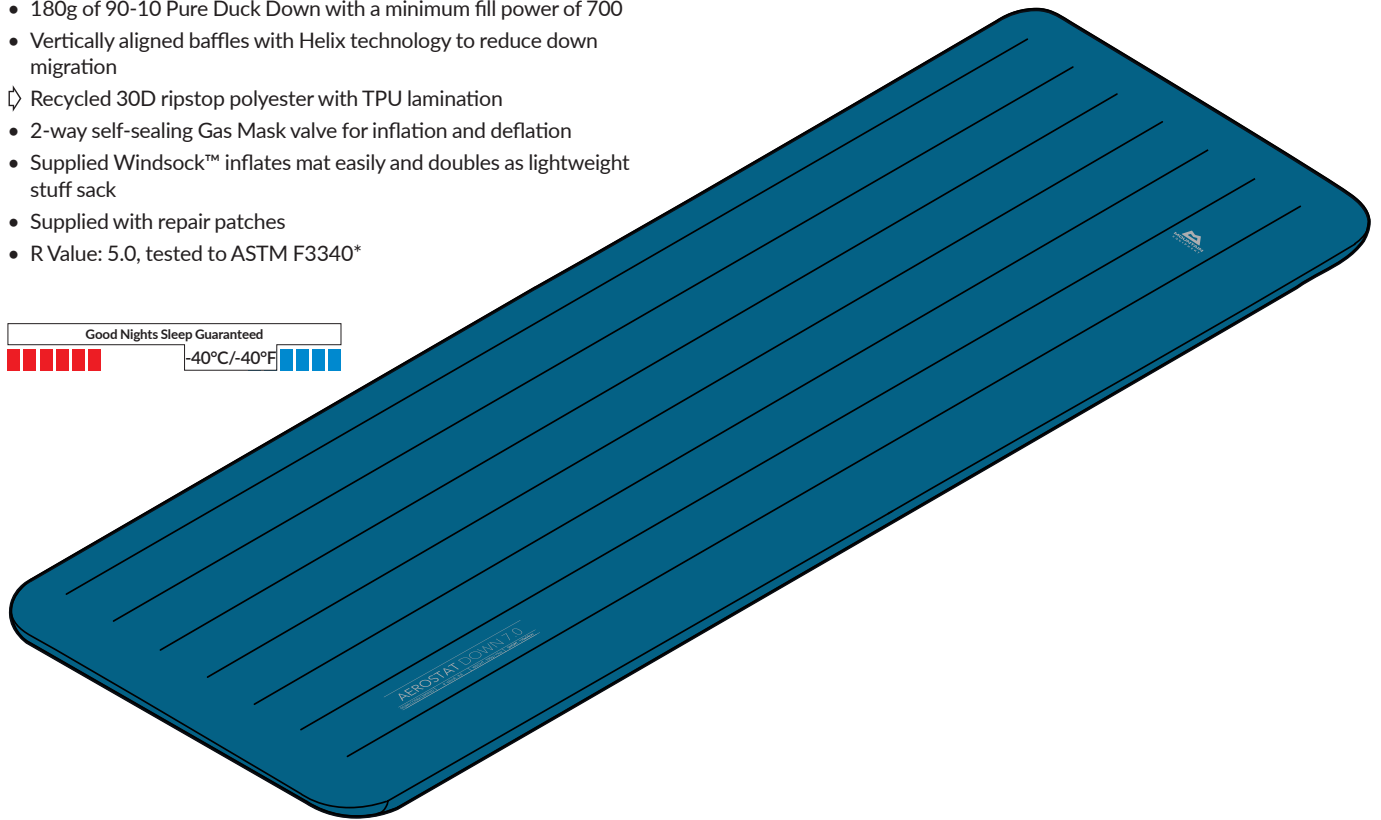

---

## AEROSTAT DOWN

A down filled sleeping mat that gives exceptional insulation and comfort with a small pack size.

- 180g of 90-10 Pure Duck Down with a minimum fill power of 700
- Vertically aligned baffles with Helix technology to reduce down migration
- ↳ Recycled 30D ripstop polyester with TPU lamination
- 2-way self-sealing Gas Mask valve for inflation and deflation
- Supplied Windsock™ inflates mat easily and doubles as lightweight stuff sack
- Supplied with repair patches
- R Value: 5.0, tested to ASTM F3340\*

### 7.0

<b>REGULAR</b>	ME-006093
Weight:	735g / 1lb 10oz
Length:	185cm
Width:	54cm
Thickness:	7cm / 2.8in
Colour:	ME-01678 Mykonos Blue

### 7.0

<b>LONG</b>	ME-006094
Weight:	855g / 1lb 14oz
Length:	200cm
Width:	60cm
Thickness:	7cm / 2.8in
Colour:	ME-01678 Mykonos Blue

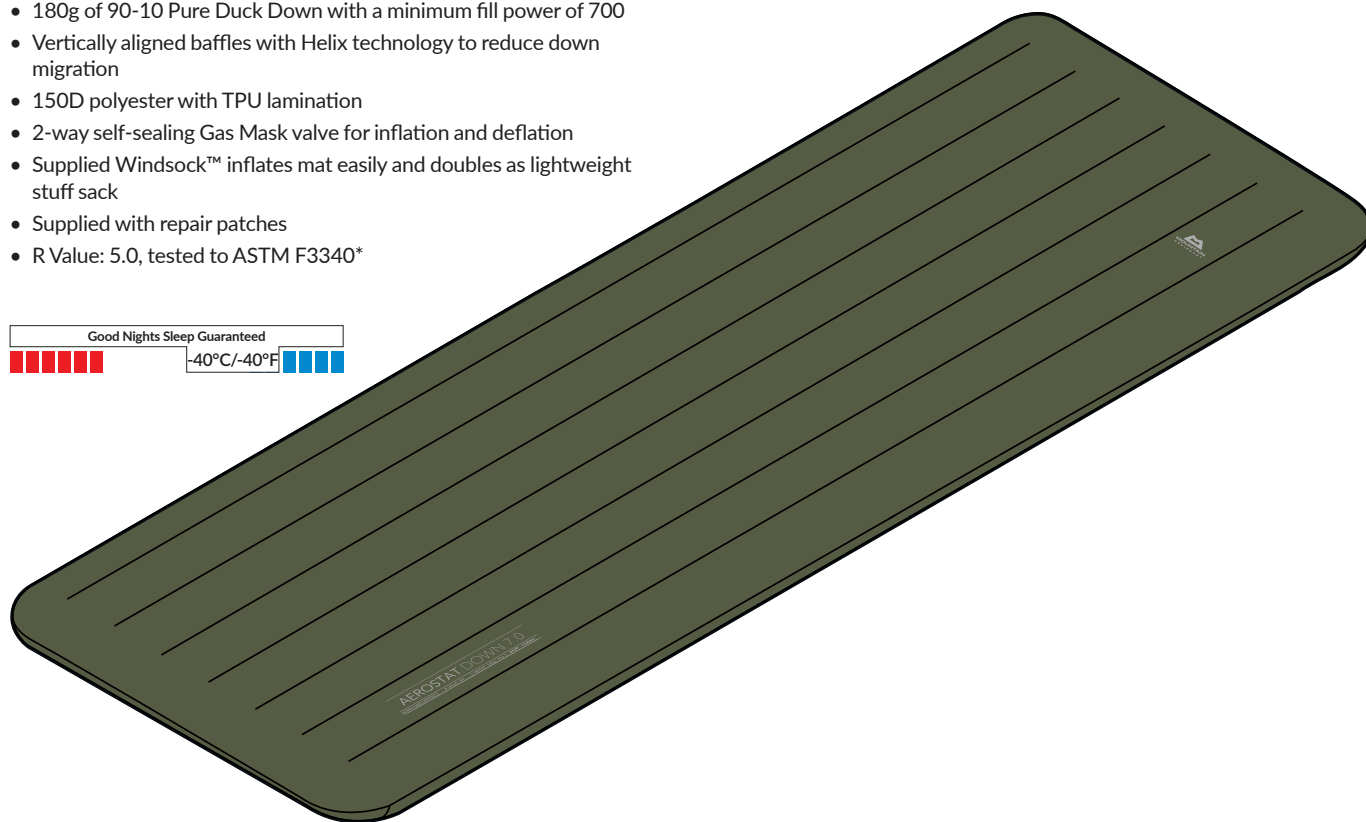

\*ASTM F3340 is the outdoor industry's first Standard method for testing the thermal performance of sleeping mats. It is designed to make comparisons between different brands' mats easier, and to ensure consistency of testing in the marketplace. Mountain Equipment were involved in the development and writing of ASTM F3340, and as of Spring Summer 2020 onwards all our mats have been tested using this new method.

## AEROSTAT DOWN ULTRA

A down filled sleeping mat with harder wearing outer fabric that is durably warm for long-lasting comfort.

- 180g of 90-10 Pure Duck Down with a minimum fill power of 700
- Vertically aligned baffles with Helix technology to reduce down migration
- 150D polyester with TPU lamination
- 2-way self-sealing Gas Mask valve for inflation and deflation
- Supplied Windsock™ inflates mat easily and doubles as lightweight stuff sack
- Supplied with repair patches
- R Value: 5.0, tested to ASTM F3340\*

## AEROSTAT WINDSOCK™

The fastest way to inflate your insulated sleeping mat.

- Rolltop polyester Windssock™ inflates mats quickly
- Shape optimised for ease of use and air expulsion
- Rolls into itself to form stuffsack with drawstring closure
- Internal pouch for storage of repair kit (not included)
- Compatible with Mountain Equipment Aerostat sleeping mats

Weight: 65g / 2.3oz  
 Colour: ME-01318 Ombre Blue

\* Note: A Windssock™ is included with all Aerostat sleeping mats

ME-006164

## SLEEPING MAT SERVICE KIT

Everything you need to make running repairs to your mat if damage occurs whilst out on expedition.

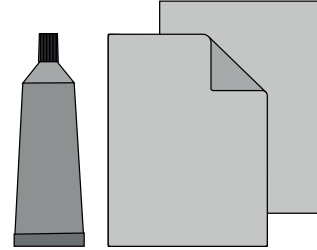

- Compatible with any Mountain Equipment Aerostat, Hoverstat or self-inflating mat
- Contains glue, fabric patches, rubber O rings, spare valve for self-inflating mats, TPU patches and instructions

Weight: 30g / 1oz  
 Colour: ME-01456 - Mixed Colour

ME-003231

## AEROSTAT REPAIR KIT

Should the worst happen, our repair kit will fix your mat right up.

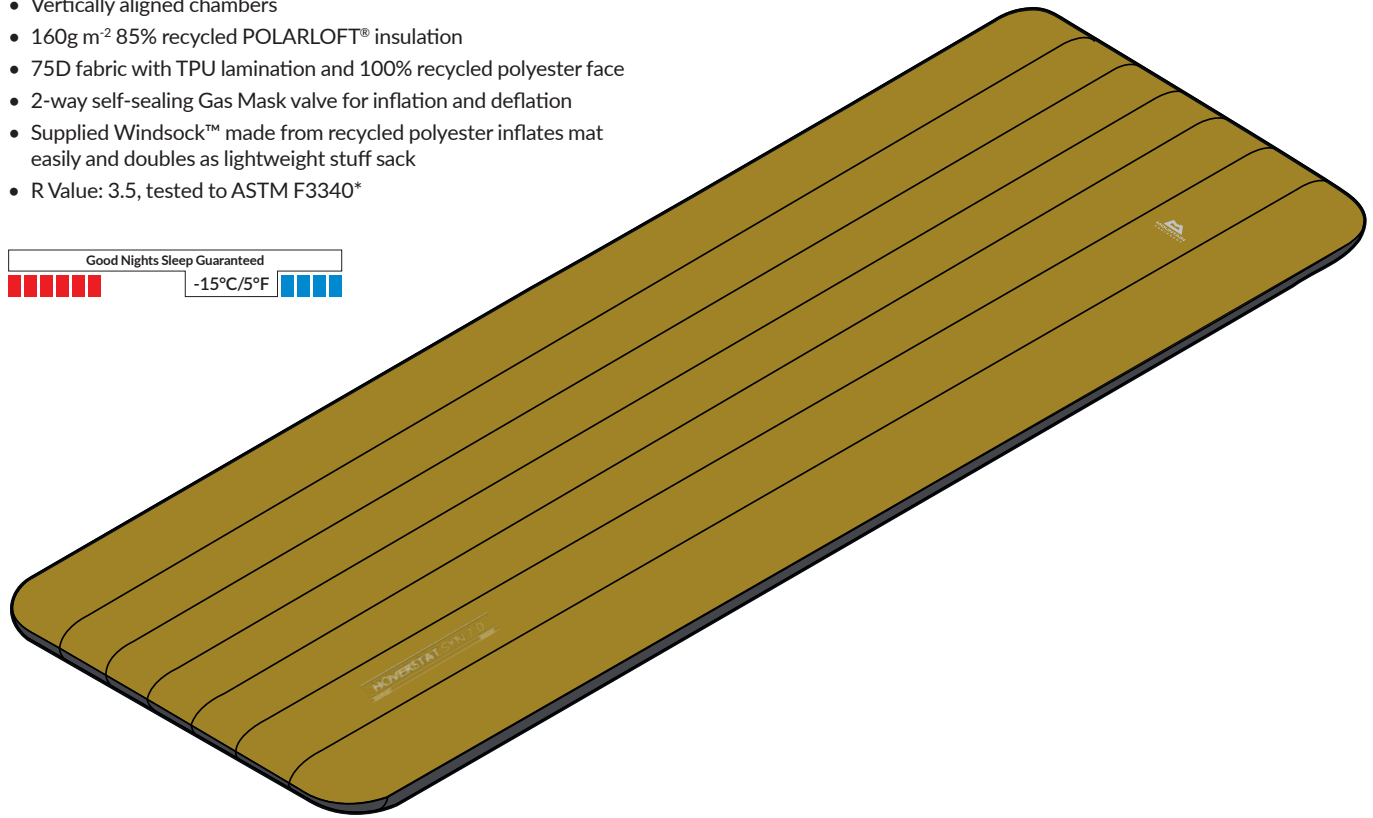

- Compatible with Mountain Equipment air mats
- Contains x2 fabric patches, x2 TPU patches, x2 O rings, x1 glue tube

\* Note: A Repair Kit is included with all Aerostat sleeping mats

## HOVERSTAT SYNTHETIC

A lightweight mat with synthetic insulation that gives great comfort and low pack size.

- Vertically aligned chambers
- 160g m<sup>-2</sup> 85% recycled POLARLOFT® insulation
- 75D fabric with TPU lamination and 100% recycled polyester face
- 2-way self-sealing Gas Mask valve for inflation and deflation
- Supplied Windsock™ made from recycled polyester inflates mat easily and doubles as lightweight stuff sack
- R Value: 3.5, tested to ASTM F3340\*

# Down Sleeping Bags

Martin Feistl & Amélie Kühne,  
Aiguille Noire de Peuterey,  
Photography by Silvan Weitz

# EXTREME EXPEDITION

---

Engineered to withstand extreme cold in the most hostile environments on earth. With durably rain-resistant fabrics and construction optimised to maximise and maintain warmth for extended periods these bags are built specifically for the needs of explorers and mountaineers undertaking the most committing journeys in the highest, coldest and most remote locations.

---

## REDLINE

Our warmest sleeping bag. Suitable for the very coldest conditions encountered during Polar expeditions.

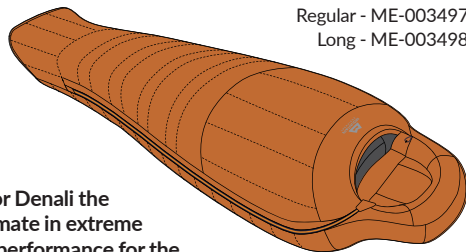

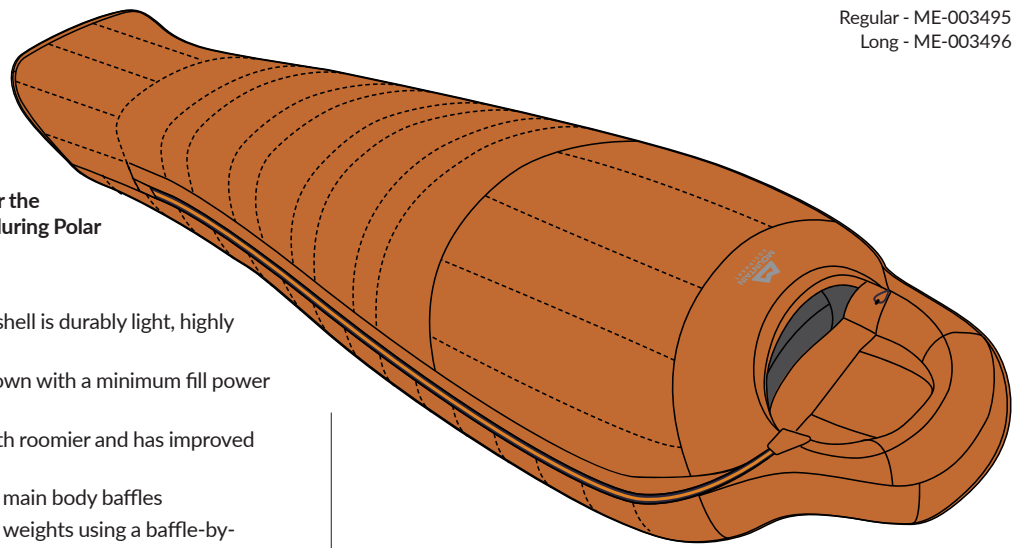

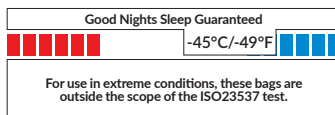

- GORE-TEX INFINIUM™ 10D outer shell is durably light, highly breathable and rain-resistant
- 1282g of 90-10 European Goose Down with a minimum fill power of 800
- Expedition fit with EXL system is both roomier and has improved loft and thermal efficiency
- V chest and foot baffles & Trapezoid main body baffles
- Optimised down distribution and fill weights using a baffle-by-baffle approach
- Ground level side seams with V-side baffle
- 7 baffle low volume anatomically shaped hood
- 6 baffle anatomically shaped offset foot-box
- Full length Gemini zip baffle with 140cm zip and integrated neck collar with Lode Lock closure
- GORE-TEX INFINIUM™ 10D inner foot-box and hood lining
- Inner pocket for keeping essentials warm and dry
- Supplied with waterproof roll-top stuff-sack and storage cube

Fill Weight: 1282g / 2lb 13oz

Total Weight: 1980g / 4lb 6oz

Std Pack Size: 30cm x 29cm x 26cm

Bag Fit: Regular & Long

Regular - ME-003497  
Long - ME-003498

## ICELINE

Whether on K2 or Denali the Iceline is the ultimate in extreme mountaineering performance for the coldest of conditions.

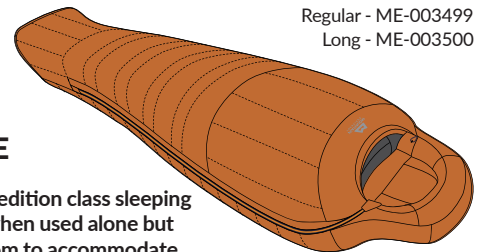

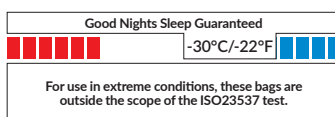

- GORE-TEX INFINIUM™ 10D outer shell is durably light, highly breathable and rain-resistant
- 994g of 90-10 European Goose Down with a minimum fill power of 800
- Expedition fit with EXL system is both roomier and has improved loft and thermal efficiency
- V chest and foot baffles & Trapezoid main body baffles
- Optimised down distribution and fill weights using a baffle-by-baffle approach
- Ground level side seams with V-side baffle
- 7 baffle low volume anatomically shaped hood
- 6 baffle anatomically shaped offset foot-box
- Full length Gemini zip baffle with 140cm zip and integrated neck collar with Lode Lock closure
- GORE-TEX INFINIUM™ 10D inner foot-box and hood lining
- Inner pocket for keeping essentials warm and dry
- Supplied with waterproof roll-top stuff-sack and storage cube

Fill Weight: 994g / 2lb 3oz

Total Weight: 1650g / 3lb 10oz

Std Pack Size: 31cm x 27cm x 24cm

Bag Fit: Regular & Long

Regular - ME-003499  
Long - ME-003500

## SNOWLINE

Our lightest expedition class sleeping bag. Ultralight when used alone but with enough room to accommodate clothing when pushed to its absolute limit.

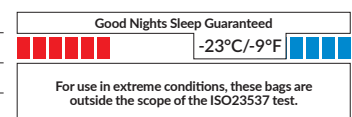

- GORE-TEX INFINIUM™ 10D outer shell is durably light, highly breathable and rain-resistant
- 831g of 90-10 European Goose Down with a minimum fill power of 800
- Expedition fit with EXL system is both roomier and has improved loft and thermal efficiency
- V chest and foot baffles & Trapezoid main body baffles
- Optimised down distribution and fill weights using a baffle-by-baffle approach
- Ground level side seams with V-side baffle
- 7 baffle low volume anatomically shaped hood
- 6 baffle anatomically shaped offset foot-box
- Full length Gemini zip baffle with 140cm zip and integrated neck collar with Lode Lock closure
- GORE-TEX INFINIUM™ 10D inner foot-box and hood lining
- Inner pocket for keeping essentials warm and dry
- Supplied with waterproof roll-top stuff-sack and storage cube

Fill Weight: 831g / 1lb 13oz

Total Weight: 1490g / 3lb 5oz

Std Pack Size: 30cm x 24cm x 21cm

Bag Fit: Regular & Long

# EXTREME ALPINE

---

Built for Alpinism at higher elevations, our Extreme Alpine series are expedition bags in all but weight. Now with a more adaptable yet technical Alpine 2.0 fit and revised EXL® system they are lighter and more protective than before. These bags have been re-developed with marginal gains in mind, specifically for climbers and mountaineers faced with the prospect of climbing over thousands of metres of technical terrain. Highly efficient, exceptionally warm and protective, these are bags designed for Alpinism's leading edge.

---

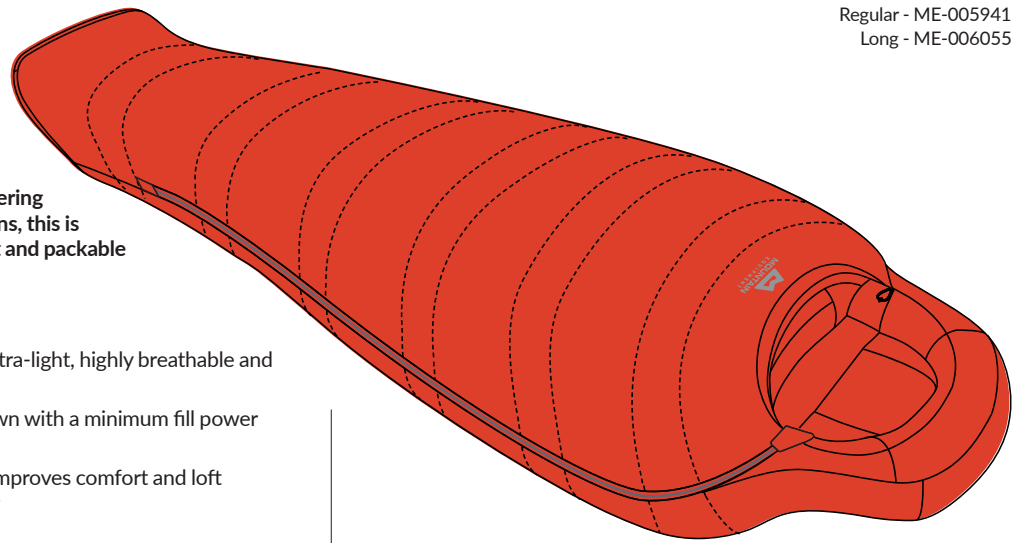

## KRYOS

Designed for alpine winter mountaineering and remote backcountry ski expeditions, this is one of the most reliably warm yet light and packable bags available.

# GLACIER

---

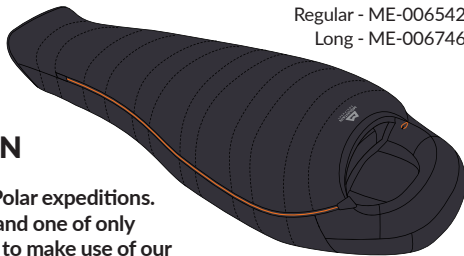

In a world of challengers, each of the Glacier models sits first among equals. Developed specifically to be best in class they offer true all-round performance and protection for unreliable conditions. Whether you are on a 3-week tent-based trek in the Himalaya, hauling a pulk across the Greenland icecap or mountaineering in the Cascades there is a Glacier bag for almost every mountain and cold weather adventure.

ME-006173

## HELIUM EXPANSION BAFFLE

A lightweight expansion baffle providing greater internal space to our down sleeping bags.

- Expands any Helium sleeping bag by 13 cm / 5 inch width
- 2 YKK® zips allow baffle to zip into existing sleeping bag
- 100% recycled HELIUM™ 20 outer shell is very light and highly breathable with PFC free DWR
- 100% recycled Supersoft 20D lining with PFC free DWR
- 30g of 90-10 Pure Duck Down with a minimum fill power of 700
- Supplied with lightweight stuff-sack

\* Not compatible with Helium Solo

\*\*Compatible with all our sleeping bags with 140cm zips

# HELIUM GT

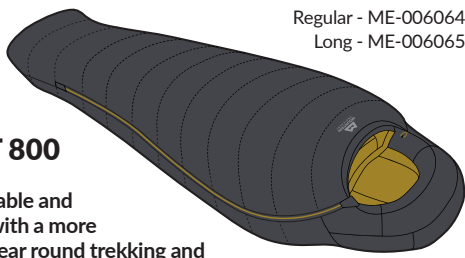

---

Designed for the long-haul and especially comfortable for those who like to sleep on their side as well as on their back, the Helium GT series provides greater comfort and more 'wiggle-room' without sacrificing performance thanks to their significantly more generous yet tapered fit. Made with PFC-Free and 100% recycled fabrics and built with the same feature-set as our standard Helium range, these bags remain highly compressible and reliably warm for extended road trips through the seasons.

---

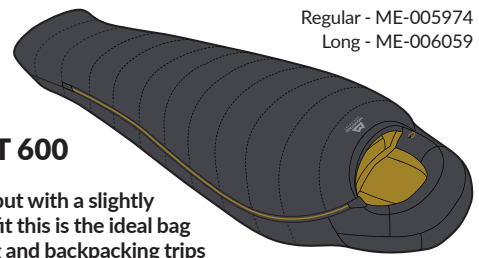

Regular - ME-006064  
Long - ME-006065

## HELIUM GT 800

A warm, comfortable and lightweight bag with a more generous fit for year round trekking and backpacking in cold conditions.

- 100% recycled HELIUM™ 20D outer shell is very light and highly breathable with PFC free DWR
- 844g of 90-10 Pure Duck Down with a minimum fill power of 700
- GT fit is roomy, comfortable and allows for a variety of sleeping positions
- Slanted box-wall baffles throughout
- Mid-level side seams
- 5 baffle anatomically shaped hood
- 4 baffle anatomically shaped and offset foot-box
- Full length Gemini zip baffle with 140cm zip and integrated neck collar with Lode Lock closure
- 100% recycled Supersoft 20D lining fabric with PFC free DWR
- Supplied with waterproof roll-top stuff-sack and storage cube

Bag Fit: Regular & Long	7°C/45°F	2°C/6°F	-12°C/10°F

# OLYMPUS

---

For those taking their first forays into the mountains, the Olympus is an excellent down-filled sleeping bag for those on more modest budgets. It offers a well thought-out and compelling feature-set which includes CODEX® audited down and PFC-Free fabrics. Packing down smaller, weighing less and likely to last far longer than nearly any comparable synthetic bag this is an ideal bag for Spring, Summer and early Autumn.

---

He helium

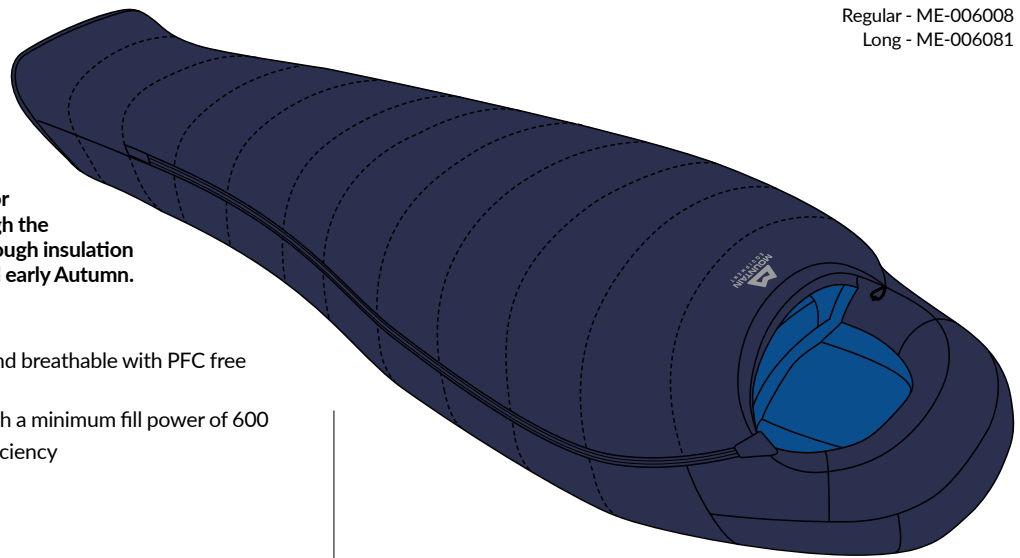

DOWN 600

## OLYMPUS 450

# FITS

The fit of a sleeping bag is crucial in optimising performance. A well-fitting sleeping bag is not only highly comfortable it also reduces dead air space and maximises thermal efficiency. Every Mountain Equipment sleeping bag is specified to one of our unique fits. In turn, bags are then available in either Regular or Long lengths and in Women's specific shape and specification where appropriate.

## Expedition Fit

Wider and marginally longer than our Mountain Fit, the Expedition Fit caters for the needs of high altitude mountaineers and polar explorers who need to wear or store additional items of clothing or even their boots inside their sleeping bag.

Expedition Fit	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	185	73	200	79
Length (a)	204	80	219	86
Max Width (b)	80	31	80	31
Inner Foot Width (c)	50	20	50	20

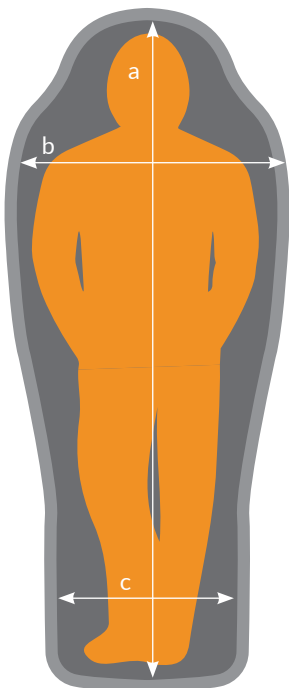

## Alpine Fit

The perfect lightweight sleeping bag shape, offering excellent comfort and usability without adding unnecessary weight.

Alpine Fit - Men's	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	185	73	200	79
Length (a)	192	76	207	81
Max Width (b)	78	31	78	31
Inner Foot Width (c)	52	20	52	20

Alpine Fit - Women's	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	170	67	185	73
Length (a)	180	71	195	77
Max Width (b)	75	30	75	30
Inner Foot Width (c)	50	20	50	20

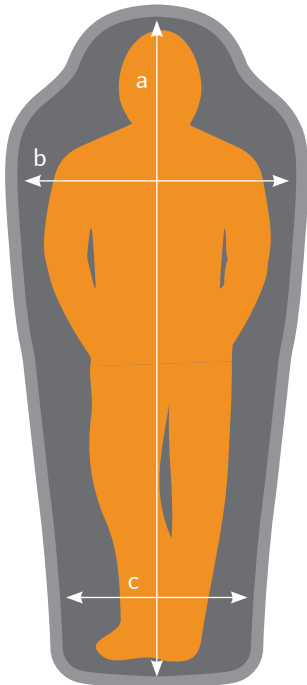

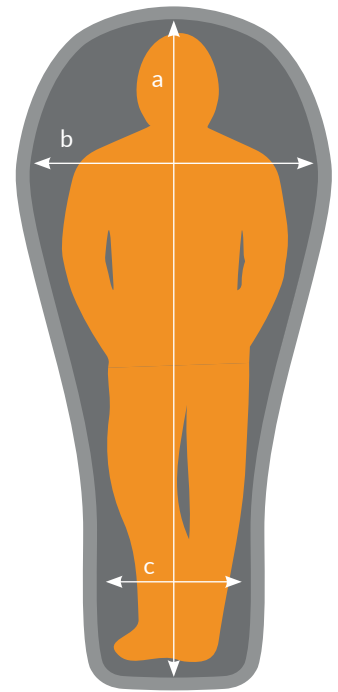

### Mountain Fit

The foundation of all our fit blocks, this semi-tapered mummy profile combines excellent thermal efficiency and comfort for all-round mountain use

Mountain Fit - Men's	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	185	73	200	79
Length (a)	190	75	205	81
Max Width (b)	78	31	78	31
Inner Foot Width (c)	50	20	50	20

Mountain Fit - Women's	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	170	67	185	73
Length (a)	180	71	195	77
Max Width (b)	78	31	78	31
Inner Foot Width (c)	50	20	50	20

### GT Fit

Our 'Grand Tourer' fit block has greater room at the shoulder, chest and hip than most of our other blocks and is designed to offer maximum comfort, allowing the user to sleep in almost any position.

GT Fit	Regular (cm)	Regular (In)	Long (cm)	Long (In)
Max User Height	185	73	200	79
Length (a)	192	76	207	81
Max Width (b)	82	32	82	32
Inner Foot Width (c)	60	24	60	24

#### Regular:

Designed to fit a maximum user height of 185cm / 6ft 1"

It will perform optimally for those users who are between 178cm and 183cm (5ft 8" and 6ft) in height.

#### Long\*:

Designed to fit a maximum user height of 200cm / 6ft 6"

It will perform optimally for those users who are between 185cm and 197cm (6ft 1" and 6ft 5") in height

#### Regular Women's:

Designed to fit a maximum user height of 170cm / 5ft 6"

It will perform optimally for those users who are between 163cm and 168cm (5ft 3" and 5ft 5") in height.

#### Long Women's\*:

Designed to fit a maximum user height of 185cm / 6ft 1"

It will perform optimally for those users who are between 178cm and 183cm (5ft 8" and 6ft) in height.

\* Some models are only available in Regular or One Size only. Please refer to individual model specifications for details.

# OUR GUARANTEES

## Proven technology that guarantees a good night's sleep...

Our sleeping bags have travelled unsupported to both poles, been on every British first ascent of an 8000m peak and been used on well over 100 Everest Expeditions. In fact, every night of the year, somewhere in the world, someone is sleeping comfortably inside a Mountain Equipment sleeping bag. This has resulted in an unsurpassed amount of data and feedback from people experienced in sleeping in real-world conditions, the analysis of which has made today's range of Mountain Equipment sleeping bags our best ever. So confident are we that our sleeping bags will keep you warm and comfortable, in addition to the EN13537 laboratory ratings we quote, you will now see

that every Mountain Equipment sleeping bag comes with a separate 'A Good Night's Sleep Guaranteed' temperature rating.

Resulting from a combination of scientific testing, countless field trials and exhaustive expedition testing, this temperature rating provides an indication as to the minimum temperature that we feel the bag should be comfortable to for an experienced user.

Should you decide that the sleeping bag you've purchased is not as warm as you'd expected it to be we'll upgrade your bag to one of a warmer specification – giving you peace of mind \*

---

\*Valid within 30 days of purchase. It is the responsibility of the customer to return the sleeping bag to the retail store from which it was purchased and to pay any difference in cost between their existing sleeping bag and the one they wish to upgrade to. Due to legal regulations, this additional warranty programme is not available in all territories – please contact your Mountain Equipment representative for more information.

# OUR GUARANTEES

## 10 YEAR GUARANTEE

Mountain Equipment down sleeping bags are designed and manufactured to the highest possible standards, are built to last and should provide you with many years of dependable service.

As such all Mountain Equipment down sleeping bags are fully guaranteed to the original purchaser for 10 years.

Therefore should one of our down sleeping bags fail you due to a defect in components, materials and/or workmanship we will, at our discretion, repair or replace it free of charge.\*\*

## 5 YEAR GUARANTEE

All Mountain Equipment Aerostat mats are fully guaranteed to the original purchaser against defects in materials or workmanship for a period of 5 years.\*\*

Please register your purchase at:  
[www.mountain-equipment.co.uk](http://www.mountain-equipment.co.uk)

\*\*Proof of Purchase required. This guarantee does not cover damage caused by normal wear & tear, misuse use or cover any claims for consequential losses. Nothing contained within this guarantee affects your statutory rights as a consumer that may vary from country to country.

# FAIR WEAR

Together with Fair Wear Foundation, Mountain Equipment are working to achieve fair working conditions in our chosen factories. Mountain Equipment has been a member of FWF since 2012 and has developed a close partnership, first achieving Leader status in 2016.

Mountain Equipment is committed to implementing the strict 8-point FWF Code of Labour Practices, which is based on UN and ILO principles. These include; the payment of living wages, reasonable working hours, safe and healthy working conditions and prevention of child labour.
